essence

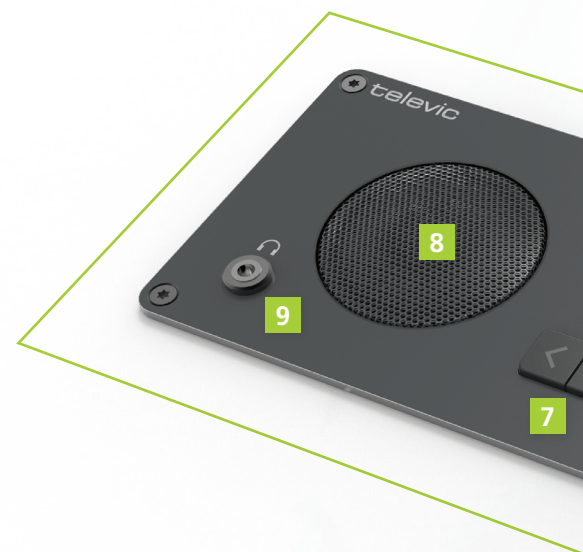

BY DESIGN

Confidea F is a new range of Plixus® Powered conference panels designed specifically for easy and flush integration into the furniture of boardrooms, meeting rooms, parliamentary debating rooms, council rooms and auditoria.

It provides solutions to improve intelligibility during meetings and debates, to allow for electronic voting or to create an environment where people of multiple nationalities are able to participate in a discussion in their own language. With Confidea F you can create the ideal meeting environment with the conference equipment integrated flush in the furniture: easy, clean and unobtrusive. The designs brings conferencing back to the essence.

The full range of 11 different models allow you to create a solution tailored to the needs of any application, with models for basic discussion, for applications that include electronic voting and for high-end applications that include simultaneous interpretation.

Since Confidea F is designed for use on the Plixus® network it takes full benefit of the Plixus audio processing and routing capabilities. It can also be combined with any other Plixus Powered product to create the most suitable solution for any install.

- 1 Removable gooseneck microphone
- 2 Microphone button
- 3 Priority button (Chairman)
- 4 Next-in-Line button (Chairman)
- 5 Language channel display
- 6 Language channel selection
- 7 Headphones volume adjustment
- 8 Broadband loudspeaker
- 9 Headphones connector
- 10 Voting buttons
- 11 RFID chip card reader

Easy for integrators

MAKE OPTIMAL USE OF DESK SPACE

Confidea F has been designed to take up a minimum of space in the furniture. For each combination of functionality there is a separately designed panel.

CLEAR FOR THE USER

The minimalistic design fits the new Televic family look. All functions have been arranged on the panel to take up a minimum amount of space while still offering the user a layout that is intuitive, clean and uncomplicated. There is still enough room between the controls so that user-friendliness is not compromised.

SMOOTH INTEGRATION IN DESKTOPS

The rounded corners make it easier for furniture builders to create a milled-out recessed area to fit the panel. In this way a clean and professional looking integration can be achieved with the conference equipment sitting snug and perfectly flush.

Highly customisable

Televic is considered to be the most flexible supplier when it comes down to customising standard solutions to fully meet the specific needs of high-end applications

Therefore, Confidea F has been designed with that flexibility in mind. The new Confidea F has been designed to leverage the possibilities of customisation. The modular architecture offers a wealth of possibilities to combine and rearrange functionality to meet specific needs. Those needs can be specific for:

COLOR

From an interior design point of view, being able to match the color of the conference equipment in the desks with the colors and materials used in the room can produce some stunning results.

SHAPE

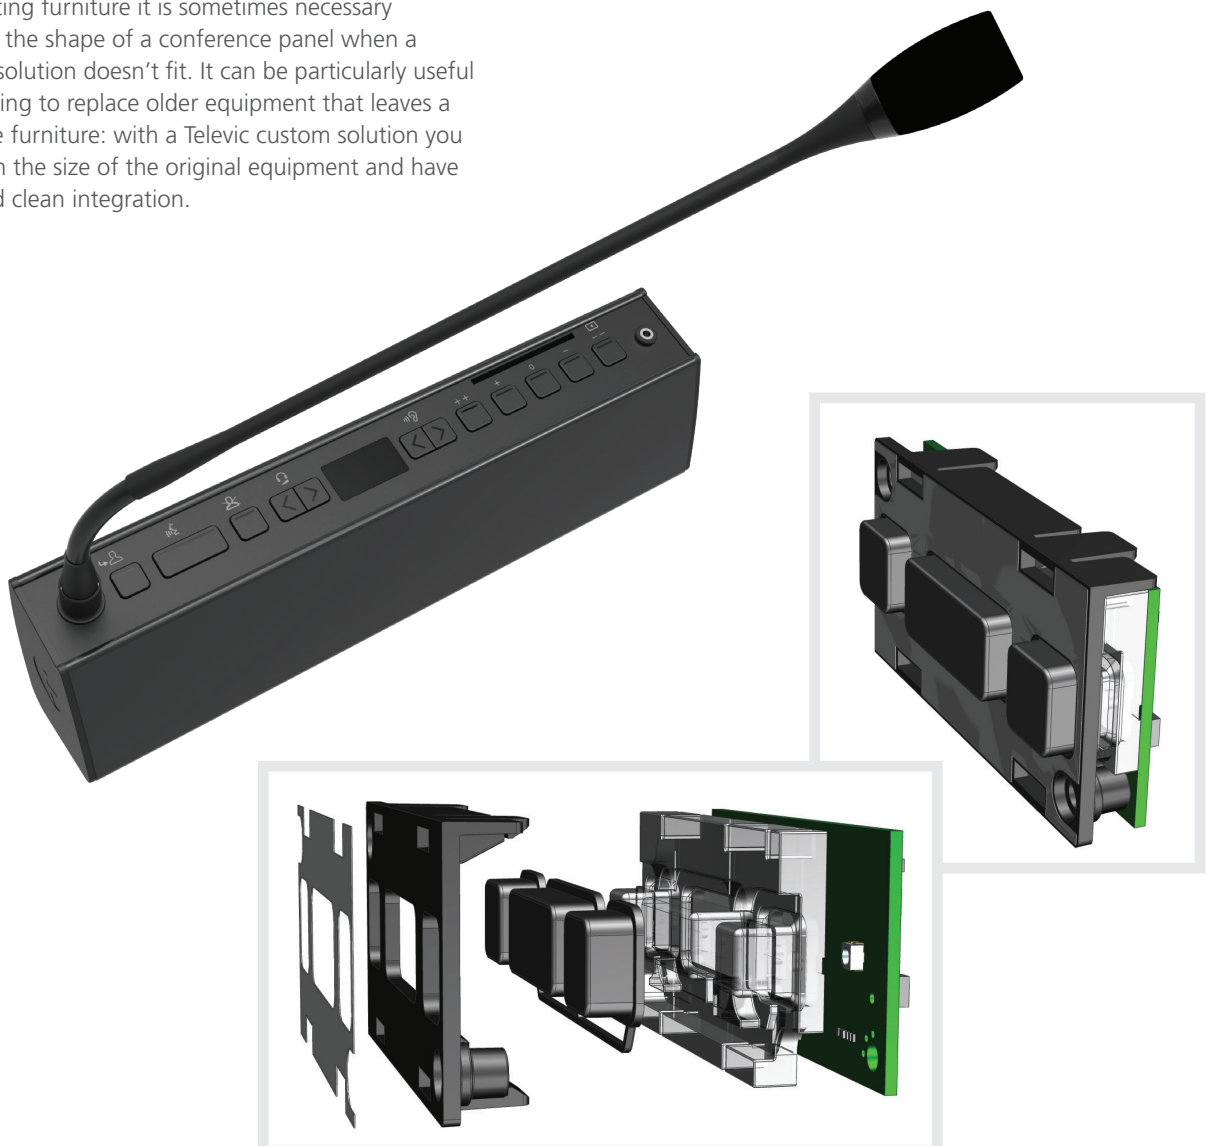

To fit existing furniture it is sometimes necessary to modify the shape of a conference panel when a standard solution doesn't fit. It can be particularly useful when having to replace older equipment that leaves a gap in the furniture: with a Televic custom solution you can match the size of the original equipment and have a nice and clean integration.

COMBINATION OF FUNCTIONALITY

Sometimes the layout of the furniture or the way an organisation works can require a specific approach as to how functionality is grouped on a conference panel or even separated and split into several panels.

TEXT SCREENING ON THE FACEPLATE

Because our equipment is often used in multilingual applications, the indications on the standard panels are made with internationally recognised symbols. However, a specific application might call for written text, a logo or a different color.

A solution for any application

DISCUSSION

Confidea F-CM

Chairman Panel

- For basic discussion
- Microphone button
- Screw-lock socket for removable microphone
- Priority and 'next' button

Confidea F-DM

Delegate Panel

- For basic discussion
- Microphone button
- Screw-lock socket for removable microphone

Confidea F-CD

Chairman Panel

- For basic discussion
- Microphone button
- Integrated speaker
- Headphones connector
- Screw-lock socket for removable microphone
- Priority and 'next' button

Confidea F-DD

Delegate Panel

- For basic discussion
- Microphone button
- Integrated speaker
- Headphones connector
- Screw-lock socket for removable microphone

VOTING

Confidea F-CV

Chairman Panel

- For discussion and voting
- Microphone button
- Integrated speaker
- Headphones connector
- Screw-lock socket for removable microphone
- RFID card reader
- 5 voting buttons
- Priority and 'next' button

Confidea F-DV

Delegate Panel

- For discussion and voting
- Microphone button
- Integrated speaker
- Headphones connector
- Screw-lock socket for removable microphone
- RFID card reader
- 5 voting buttons

SIMULTANEOUS INTERPRETATION

Confidea F-CI

Chairman Panel

- For discussion and interpretation
- Microphone button
- Integrated speaker
- Screw-lock socket for removable microphone
- Language channel selector
- Headphones connector
- Headphones volume adjustment
- Channel information display
- Priority and 'next' button

Confidea F-DI

Delegate Panel

- For discussion and interpretation
- Microphone button
- Integrated speaker
- Screw-lock socket for removable microphone
- Language channel selector
- Headphones connector
- Headphones volume adjustment
