# Congressify

## BYOD Solution for Richer Meetings

## Description

Congressify is a BYOD (Bring Your Own Device) solution that gives participants access to rich meeting information on their tablet.

Thanks to a seamless integration with the CoCon software suite, **delegates** get access to the following features right at their fingertips:

» Who is speaking and who is up next
» Speech timers
» Voting results
» Documents for the meeting (PDF-format)
» Information per agenda item (speaker, topic)
» Biography of delegates

The **chairperson** enjoys the same the functionality and even has basic meeting control available:

» Manage microphones
» Start & stop agenda topics
» Start & stop voting sessions

### Up and Running in No Time

Congressify makes it easy for everyone to be up and running in no time. After requesting a license based on the number of active users, installation is as easy as running an installer. Then configure the meeting & participants in the CoCon software suite and you're all set. For participants, there is no configuration or installation. All it takes is browsing to an address on a tablet and logging in with a name and password.
